   A. Registration per capita 6
      Visits per capita
      In-library use per capita
      Reference per capita
      Program attendance per capita

   B. Circulation per capita 8
      Turnover rate
      ILL net lending rate
      ILLs requested per 1000 circulations
      Circulation per hours open

4. INPUT MEASURES 10

      Service population per staff
      Volumes per capita
      Acquisition rate
      Staff expenditures per capita
      Materials expenditures per capita
      Operating expenditures per capita

5. PUBLIC LIBRARY STATISTICS

   A. Population 12
      Population in service area
      Population served by contract
      Total population served
      Registered borrowers
      Percent registered
      Nonresident borrowers

   B. Collection and Service Outlets 16
      Items added in FY1987
      Items withdrawn in FY1987
      Total held as of 9/87
      In library use of materials per typical week
      Total circulation
      Central library
      Branches
      Bookmobiles
      Other outlets

C. **Services** 20
Hours open per typical week
Library visits per typical week
Reference questions answered per typical week
Total programs
Total program attendance
Interlibrary loans provided to other libraries
Interlibrary loans received from other libraries

D. **Staff** 24
Librarians with MLS degree (full time equivalent)
Others with title of librarian (FTE)
Other paid staff (FTE)
Total staff (FTE)
Volunteers (FTE)
Director's salary
Director's hours worked per week

E. **Funding** 28
Local government
State government
Federal government
Other income
Total income
Income per capita
Donations

F. **Expenditures - Part 1** 32
Salaries
Benefits
Collection
Equipment and furniture
Plant operation
All other operating

G. **Expenditures - Part 2** 36
Total operating
Capital outlay
Total expended
Expenditures per capita

6. **LIBRARIES WITH NO PUBLIC TAX SUPPORT** 40

A. **Selected statistics** 41
Population
Registered borrowers
Hours open per week
Total volumes held
Circulation
Total income
Total expenditures

APPENDIX

A. **Public Libraries by Name, with County and City** 42

B. **Public Libraries by Population in Service Area** 44

C. **Public Libraries by Total Expenditures per Capita** 47

INTRODUCTION

The 1987 Idaho Public Library Statistics include performance (output and input) measures as well as the basic statistics for population, collection, services, staff, funding, and expenditures.

Two groups are responsible for the availability of these statistics: the public librarians who took the time to fill out the Report Forms accurately and completely, and the State Library Public Library Consultants who reviewed the completed forms.

The statistics were gathered by the State Library with the "Public and District Library Annual Statistical Report Form." That report is to reflect:

1. all monies available to a library during the report year, regardless of the source of the funds,
2. all expenditures made by the library, regardless of the source of the funds, and
3. populations served, and collection, services, and staff provided during the report year.

The Report Form is also in compliance with the Federal/State Cooperative Public Library Data System, in which Idaho has been participating since 1986. The Report Form has varied slightly from year to year as the System evolves from a pilot project to a national database of public library statistics.

Be creative in thinking about how the information supplied by these numbers can help you improve library services. Use them to analyze your services and to work with your local government and your public.

It is important to remember that performance measures and comparative statistics are not absolutes. There are no right or wrong measures or statistics, and no single statistic or performance measure tells a complete story. An individual library's statistics should be considered in the context of its role(s), goals, and objectives.

Additional information on the use of statistics may be found in the American Library Association's *Planning and Role Setting for Public Libraries* and *Output Measures for Public Libraries*. Assistance in analyzing the statistics and performance measures is available from the State Library Development Division.

1. NOTES ON THE STATISTICS

A. How to Locate Performance Measures and Statistics for Your Library

In Section 3, Output Measures, and Section 4, Input Measures, libraries are listed in alphabetical order by library name.

In Section 5, Public Library Statistics, libraries are listed alphabetically by county and then by library name under each of six types of statistics: Population, Collection, Services, Staff, Funding, and Expenditures.

B. Reporting Libraries

Of the 109 publicly funded libraries in the State, 102 submitted 1987 Statistical Report Forms in time for publication. The seven non-reporting libraries do appear in the statistical tables with zeros or asterisks under all the data items except population served. Those libraries are:

Bellevue Public	Shelley Public	Fremont County District
St. Anthony Public	Gibbonsville Community	Wendell Public
Glenns Ferry Public		

C. Contracting Libraries

Four of the reporting libraries are districts which currently contract with other libraries to provide all services for their patrons. Contracting districts have legally established boards and levy taxes, but have no facility, collection, or other services.

These libraries are included in the statistical tables. They report Population, Funding, and Expenditure figures, but other data items are reported as zero. Services provided to their patrons are included in the numbers reported by the libraries with which they contract. The contracting districts are:

Ada County	Bonneville County	Benewah County	Franklin County

D. Accuracy of the Statistics

The statistics appearing in Section 5, Public Library Statistics, are *as they were reported by the local library* to the State Library except where obvious inconsistencies were spotted in review by the Public Library Consultants. In most cases, inconsistencies were resolved by the library providing revised figures.

The figures appearing in Section 3, Output Measures, and Section 4, Input Measures, are based on the reported statistics but were calculated by microcomputer.

The statistics as published do not differentiate between an item reported as "0" and an item not reported (blank), which is an inherent inaccuracy. A reported 0 means "we don't have any" or "we don't offer that service." The meaning of a blank cannot be determined. For example, a blank for "Items withdrawn" could mean that the library withdrew 0 items from its collection during the year. Or it could mean that it did withdraw items but did not count, estimate, or report the number of items withdrawn.

In Sections 3 and 4, each per capita-based output and input average is the average only for those libraries reporting that item. The total population served by those libraries reporting that item was used as the divisor. The population of libraries reporting 0 (or no report) for that item are not reflected in the average.

For example, the average Registration per Capita (0.39) reflects the average of only those libraries (94) that reported a figure for Registered Borrowers. Libraries that do not register their borrowers (or did not report a number) are not included in the formula.

E. Libraries with No Public Tax Support

Twelve libraries offer some public library services to their communities but receive no regular public tax support from a city or district. These libraries rely on fundraising activities, donations, and/or volunteer staff to provide their services. Selected statistics for these libraries are listed in Section 6.

2. DEFINITIONS FOR PERFORMANCE MEASURES

The following section defines specific output and input measures and, where applicable, refers to *Standards for Idaho Public Library Services.*

In figuring per capita measures, the library's legal service area population is the number of persons living within the boundaries of the library's jurisdiction (city or district) plus the population of any areas served by contract. The number of non-resident borrowers is not included in the per capita formulas.

A. OUTPUT MEASURES

Registration per capita

This measure relates the number of persons registered as borrowers to the number of persons in the library's legal service area. It is the number of registered borrowers divided by the total population served by the library.

The measure indicates the percentage of the library's potential users who know the library exists and have implied an intent to use it by registering for a card.

Figures for libraries which have not updated their registration files within the past 3 years cannot be considered accurate.

Standards for Idaho Public Library Services: Users and Usage, #4. The minimal standard is .50.

Visits per capita

This measure relates the number of visits made to the library to the number of persons in the library's legal service area. It is attendance at the library during a typical week multiplied by 50 (the average number of weeks a public library is open during a year) divided by the total population served by the library.

The measure reflects actual visits to the library. Attendance per typical week is usually estimated by counting the number of persons who enter the library during a typical week.

Standards for Idaho Public Library Services: Users and Usage, #3. The minimal standard is 3.0.

In-Library use per capita

This measure relates the number of materials used in the library (but not checked out) to the number of persons in the library's legal service area. It is in-library use per typical week multiplied by 50 (the average number of weeks a public library is open during a year) divided by the total population served by the library.

The measure indicates the average number of items used in the library (but not checked out) per resident of the library's legal service area. In-library use per typical week is usually estimated by counting the number of items to be reshelved or refiled during a typical week.

Standards for Idaho Public Library Services: Materials, #13. The minimal standard is 1.5.

Reference per capita

This measure relates the number of information contacts in which a staff member involves information sources to the number of persons in the library's legal service areas. It is the number of reference transactions per typical week multiplied by 50 (the average number of weeks a public library is open during a year) divided by the total population served by the library.

The measure indicates the average number of times a resident of the service area received staff assistance in using information sources available at or accessible through the library.

Standards for Idaho Public Library Services: Reference, #5. The minimal standards is 0.5.

Program attendance per capita

This measure relates attendance at scheduled presentations which are sponsored by the library (on or off library premises) to the number of persons in the library's legal service area. It is program attendance divided by the total population served by the library.

The measure indicates the percentage of residents of the library's service area who attended a library program during the year.

Circulation per capita

This measure relates the number of items circulated to the number of persons in the library's legal service area. It is the total circulation divided by the total population served by the library.

The measure indicates the average number of items circulated during the year to each resident of the library's legal service area.

Standards for Idaho Public Library Services: Materials, #12. The minimal standard is 7.0.

Turnover rate

This measure relates the number of items circulated to the size of the collection. It is the total circulation divided by the number of volumes held in the collection at the end of the year.

The measure indicates the average number of times each item in the collection was circulated, assuming that circulation was evenly distributed among the library's holdings.

Standards for Idaho Public Library Services: Materials, #10. The minimal standard is 2.0.

ILL net lending rate

This measure relates the number of materials provided to other libraries through interlibrary loan to the number of materials borrowed from other libraries through interlibrary loan. It is the number of items loaned divided by the number of items borrowed.

The measure indicates items loaned as a percentage of items borrowed through interlibrary loan. A number above 1.0 indicates the library does more lending; a number below 1.0 indicates the library does more borrowing.

ILLs per 1000 circulations

This measure relates the number of materials borrowed from other libraries to the number of materials from the local collection circulated to borrowers. It is the number of materials borrowed from other libraries through interlibrary loan divided by total circulation multiplied by 1,000.

The measure indicates the number of interlibrary loans for every 1,000 items circulated from the local collection.

Circulation per hours open

This measure relates the number of materials from the local collection circulated to the number of hours the library is open. It is the total circulation divided by the number of hours open per typical week multiplied by 50 (the average number of weeks a public library is open during a year).

The measure indicates the average number of items checked out each hour the library was open, assuming that circulation was evenly distributed throughout the year.

B. INPUT MEASURES

Service population per staff

This measure relates the number of persons in the library's legal service area to the number of full-time equivalent (FTE) staff. It is the total population served by the library divided by the number of library staff in FTEs.

Full-time equivalent (FTE) is the total number of hours per week worked by all paid staff divided by 40. In this context, full-time means 40 hours per week, regardless of how many hours per week the library is open.

The measure indicates the average number of persons each member of the staff might serve, and the potential workload to be carried by each.

Volumes per capita

This measure relates the number of volumes in the library's collection to the number of persons in the library's legal service area. It is the number of print volumes and non-print units held by the library divided by the total population served by the library.

The measure indicates the average number of volumes and units held for each person in the library's legal service area.

Acquisition rate

This measure relates the number of new acquisitions to the overall size of the collection. It is the number of titles acquired during the year divided by the number of titles held by the library (including the new ones).

The measure indicates the percentage of the library's collection which was acquired during the year. It is a measure of the growth of the collection, not necessarily its currency.

Staff expenditures per capita

This measure relates the amount of library funds spent on staff to the number of persons in the library's legal service area. It is the dollar amount paid in salaries, wages, and benefits divided by the total population served by the library.

The measure indicates the average cost per resident of staffing the library.

Materials expenditures per capita

This measure relates the amount of library funds spent on materials for the collection to the number of persons in the library's legal service area. It is the dollar amount spent on materials divided by the total population served by the library.

The measure indicates the average cost per resident of purchasing newly acquired materials.

Operating expenditures per capita

This measure relates the total amount of library funds spent for operating (excluding capital expenditures) to the number of persons in the library's legal service area. It is the dollar amount spent on staff, materials, and other operating divided by the total population served by the library.

The measure reflects the average cost per resident of operating the library.
